VIRUSTEIPPI • VIRUSTEJP

**KILLS VIRUSES &
BACTERIA WITHIN
SECONDS!**

**KILLS EVEN
NOROVIRUS
AND SALMO-
NELLA!**

Protect your staff and customers from infections

ViralSafe virus tape is proven to inactivate several viruses and bacteria on it within seconds. Cut pieces from the tape roll and apply them to surfaces that are frequently touched, in order to protect people from infections.

ViralSafe kills even norovirus which is immune to hand sanitizers and disinfectants. By using ViralSafe you significantly reduce the risk of infections with your staff and your customers, helping also eliminate absence through sickness.

One metre of ViralSafe virus tape is typically enough to cover 7-10 door handles or 15-30 light switches. ViralSafe virus tape is easy to install and remove. Replace the tape with a new one when it gets worn out or dirty.

As it wears out, red control color under the coating becomes visible. Use ViralSafe products safely. Always read the labels and product information before use.

List of bacteria & viruses that ViralSafe inactivates:

VIRUKSET / VIRUSES / VIRUS

Murine Norovirus	<30 min. 100% 60 sec. 96,7%
